Technical Specifications

05

Specification of Capacitive Coupling Patient Plate

- Designed to use during monopolar surgery to reduce risk of burning
- Made of conductive metal between sheets of urethene and saddled between two plates of Polymer Akton
- Should be universal to be used on both sides
- Should be compatible to any Electrosurgical generator
- Should be Radiolucent & latex free, no adhesive related irritation to patient skin.
- Should be compatible to work with C arm radiography systems
- Should not stick with patient skin
- Should be usable for any of both side touching patient
- Should be usable with warming devices where the temperature of the warming device is transferred to the pad
- Should have Current limiting nature & hence eliminate Patient pad site burns
- Should be usable with Argon beam coagulator
- Patient Plate can be folded without damaging
- Can be used for all patient's weight >350 grams
- Should be US FDA/CE/Indian equivalent approved
- Should be compatible to any Electrosurgical generator
- Size: 36" L x 20"W x 1/8"thickness
